

Information Security Policy

	Information security policy		Public use
	13/02/2025	Version 1	

At DynamicsValue, a developer-led company dedicated to building the most amazing test driven development software for developers of the Power Platform, we are aware of the importance of information security for the daily development of our activity and the correct management of information and assets of our organisation.

In order to ensure this management, at DynamicsValue we have implemented an Information Security Management System in accordance with the requirements of the ISO/IEC 27001:2022 standard to guarantee the continuity of the information systems, minimise risks and ensure compliance with the objectives set.

In order to guarantee the effectiveness and application of the Information Security Management System, an Information Security Committee is established, which will be responsible for the approval, dissemination and compliance with this Security Policy, as well as for the supervision, implementation, development and maintenance of the Management System.

The objective of this Security Policy is to establish the necessary framework for action to protect information resources against threats, whether internal or external, deliberate or accidental, in order to ensure compliance with the confidentiality, integrity and availability of information. To this end, the following commitments are issued below:

- Comply with current legislation on information security.
- To ensure the privacy of the data managed by DynamicsValue for customers, employees, suppliers and third parties.
- To guarantee the confidentiality, availability and integrity of our organisation's own information assets.
- Identify and reduce information security risks relevant to our organisation.
- Ensure the capacity to respond to emergency situations, re-establishing the operation of critical services in the shortest possible time.
- Protect information assets according to their value or importance.
- Promote information security awareness and training.
- Establish a reference framework for the fulfilment of objectives and goals in the field of information security, as well as continuous improvement in our activities and processes.

Any person whose activity may, directly or indirectly, be affected by the requirements of the Information Security Management System is obliged to strictly comply with the Security Policy.
